RollMatic  
Garage Doors

Features

## SUPERIOR DESIGN OUTSTANDING INNOVATION

### DOUBLED SKINNED INSULATED GARAGE DOORS

In comparison to the rigid ribbed profiles of competing roller doors, the smooth surface profile of the RollMatic looks modern and elegant. The aluminium panels have a high-quality coating on the inside and outside of the door surface making it easy to clean. Furthermore, the hollow space of the profile is evenly filled with polyurethane rigid foam for quiet door travel and insulation.

### COMPACT ROLLER GARAGE DOOR

The compact roller RollMatic is the best choice if the ceiling area of the garage should remain free. The door curtain compactly winds up into the lintel of the door opening, thus allowing you to use the ceiling for lamps or as an additional storage space. The RollMatic is also available as an external roller garage door for ideal situations with little internal side room.

### SPACE-SAVING OVERHEAD GARAGE DOOR

For garages with a particularly low headroom, the overhead garage door option RollMatic OD is especially suitable. The door curtain is guided up and under the ceiling through narrow side guides. Due to the space-saving, lateral operator the RollMatic OD has a required headroom of only 60 mm.

### RELIABLE AUTOMATIC SAFETY CUT-OUT

The integrated counterbalance systems in the side guides supports the operating system during the opening and closing of the door and prevents damage to the opening system. The multiple spring assemblies and the double lifting cables prevent the door leaf from crashing to the floor in every position. In case of emergency, such as a power outage, this assists with opening the door easily by hand.

HÖRMANN

## ROLLMATIC

The RollMatic features a wide variety of innovative details with a single objective: providing you with security and comfort. From the particularly simple fitting through to the sophisticated safety patents, this concept runs through all aspects of the product.

Available in two space saving options, the RollMatic roller door system is the best choice if you wish to keep the ceiling free. The garage door curtain winds up into a cylindrical shape either internally or externally of the garage wall. This allows the use of the ceiling for storage or lighting fixtures.

## ROLLMATIC OD

The RollMatic OD is a garage door system well suited for particularly low headroom areas. The door curtain is guided up and under with the ceiling by narrow track guides. This option requires only 60mm of headroom and is exceptionally space saving.

## PRACTICAL INNOVATION. INTUITIVE SOLUTIONS.

### GLAZING ELEMENTS

Get more daylight in your garage! The glazing elements with synthetic panes are arranged across the entire profile width. The number of elements depends on the respective door width. A maximum of ten panels or sections on the garage door profile can be fitted with glazing elements in each door.

### VENTILATION GRILLES

Ventilation of your garage improves the room climate and prevents mould. Ventilation grilles are made of long-lasting plastic and arranged across the entire door width. Each door can be equipped with a maximum of ten panels or sections with ventilation elements.

## MATCHING SOLUTIONS, GREAT APPEARANCE.

### MATCHING SIDE DOOR FOR EVERY ROLLMATIC DOOR

At Hörmann, side doors are given just as much consideration as the garage door system, as the overall appearance is only perfect if the side door matches the roller garage door. Therefore the NT 60 side door is available in all surface finishes and colours. The high-quality 60 mm aluminium frame construction is the ideal frame for the door infill and is fastened with glazing beads as standard.

Garage Doors

Colour  
& Finishes

Your perfect garage door may be elegant, bold or perhaps just harmonise with its environment. Every 4D product is designed to help your home make a unique statement that reflects your individual style. Of course, the engineering is crucial as well and that is why 4D doors are manufactured with an uncompromising focus on safety, strength and innovation. We are here to provide solutions for every requirement.

## CONTEMPORARY THINKING TIMELESS STYLE

### DECOGRAIN

A. Golden Oak / B. Rosewood

The two Decograin decors in the colours Golden Oak and Rosewood have a convincingly real timber look. A special abrasion-resistant surface protection preserves the UV-resistant plastic film coating on the profiles over a long time.

### ROLLER GARAGE DOOR ROLLMATIC

To create a uniform appearance, the side guides as well as the lintel and barrel casing are supplied in a matching Decograin decor. The Decograin surface finish is not available for external roller garage doors.

### OVERHEAD GARAGE DOOR ROLLMATIC OD

The side guides and the fascia panel are powder-coated in the base colour of the decor.

# STRENGTH OF STEEL BEAUTY OF TIMBER

## DECOPAINT

A. Golden Oak / B. Rosewood  
C. Anthracite Metallic

The Decopaint decors Golden Oak and Rosewood are an inexpensive alternative to Decograin surface finishes. The interior and exterior of the profiles are painted to look like timber. An elegant Anthracite Metallic paint is used for the colour Noir 2100 Sablé.

## ROLLER GARAGE DOOR ROLLMATIC / OVERHEAD GARAGE DOOR ROLLMATIC OD

The side guides, fascia panel and curtain cover are powder-coated in the base colour of the decor to create a harmonious appearance.
